

NEESPI focus issues in *Environmental Research Letters*

Julian Norman (1), Pavel Groisman (2), and Amber J Soja (3)

(1) IOP Publishing, Bristol, UK (julian.norman@iop.org), (2) NOAA National Climatic Data Center, NOAA, Asheville, North Carolina, USA (pasha.groisman@noaa.gov), (3) National Institute of Aerospace, Hampton, Virginia, USA (amber.j.soja@nasa.gov)

In 2007 and 2009 *Environmental Research Letters* published focus issues (edited by Pavel Groisman and Amber J Soja) made up of work carried out by NEESPI participants. Here, we present the content of those focus issues as an invaluable resource for researchers working in the NEESPI study area. The first of the two issues, published in 2007 with title “Northern Hemisphere High Latitude Climate and Environmental Change”, presents a diverse collection of articles that are assembled into five groups devoted to studies of climate and hydrology, land cover and land use, the biogeochemical cycle and its feedbacks, the cryosphere, and human dimensions. The second issue, published in 2009, with title “Climatic and Environmental Change in Northern Eurasia” presents diverse, assorted studies of different aspects of contemporary change, representing the diversity of climates and ecosystems across Northern Eurasia.
