

## Eumetcal Training Activities and Strategies

Alessandro Chiariello and Tero Siili

Finnish Meteorological Institute, Human Resource Development, Helsinki, Finland (alessandro.chiariello@fmi.fi)

Eumetcal is the EUMETNET training co-operation programme between the national hydro-meteorological services (NHMS) in Europe, established in 2001. The mission of Eumetcal is supporting the NHMSs in the professional training of their meteorological staff with emphasis on advanced learning methodologies and e-learning solutions.

The Eumetcal Programme benefits the support of a large and well established network of trainers and experts in meteorology from the EUMETNET and overseas NHMS, and non-governmental organisations.

In this presentation the activities and results achieved in the first half of the project mandate for 2013-2017 will be shown and critically analyzed. In addition, the topics and strategy for the implementation of the second half of the project will be presented, with emphasis on the competency driven approach for the the organisation of training activities.
