

On the premise Sumatran earthquake 26 December 2004

N. Bulatova

IFZ RAS, RAS, Moscow, Russian Federation (2102.g23@g23.relcom.ru)

Bulatov's spatio-temporal technology is applied for establish a regularity in distribution of the planetary seismicity depends on influence of the positions and dynamics of oscillations of the Sun and Moon with respect to the Earth's equatorial plane. The main sources of tide-generating forces on the Earth produced deformation process comes to an agreement with obtained regularity.
