

## Seasonal Hurricane Prediction: a User Perspective

J. Kleinn

Aspen Re, Research & Development, Zurich, Switzerland (jan.kleinn@aspen-re.com)

Seasonal predictions of hurricanes in the Atlantic basin are regularly published by several organizations before and during the hurricane season. This presentation will highlight the requirements these kind of seasonal forecasts need to fulfil to be useful to the reinsurance industry. At the same time, the benefit to the reinsurance industry of the past seasonal forecasts will be evaluated.
