

## The GEO Water Tasks: What do they address and accomplish?

P.J. van Oevelen (1), R.G. Lawford (1), and D Cripe (2)

(1) International GEWEX Project Office, Suite 1550, 8403 Colesville Road, Silver Spring, MD 20910-6374, USA, (2) GEO Secretariat, 7bis, avenue de la Paix, Case postale 2300, CH-1211 Genève 2, Switzerland

This presentation will give a concise overview on the GEO Water related tasks and their progress and what they hope to accomplish. With the current 'revival' of the energy-water nexus and the increased public awareness of the water problem the activities under the GEO water umbrella have an opportunity to have more visibility while accomplishing their tasks. Both water quality and quantity aspects will be addressed as well as the most important or crucial links to other activities under different GEO tasks.
