

Plans and Combined Operations of the Flight Elements of the Europa Jupiter System Mission (EJSM)

Christian Erd and K. Clark and the EJSM System Teams
European Space Agency, Netherlands

The Europa Jupiter System Mission (EJSM) is a joint NASA-ESA mission candidate, where ESA would provide the Jupiter Ganymede Orbiter (JGO) and NASA would provide the Jupiter Europa Orbiter (JEO). Both spacecraft are foreseen to be launched in 2020, allowing for a joint exploration of the Jovian system, and the Galilean moons.

The planning of the development, implementation and combined science phase will be described in the poster.
