

## **Layout selection in shallow geothermal systems; some case studies in Italy**

Davide Maritan and Alessandro Trevisan

Geotherm srl Earth Energy Systems Italy ([www.geotherm.it](http://www.geotherm.it) - [info@geotherm.it](mailto:info@geotherm.it) / +390456103612)

Geothermal heat pumps use different ways to interact with the ground and extract solar energy. In this article some case studies are presented, with the intent to describe the technical approaches adopted and it tries to find a scheme for the layout (vertical, horizontal, open and compact) selection.
