

## **Geoscience Information For Teachers (GIFT) Workshops at the European Geoscience Union**

Eve Arnold (1), Friedrich Barnikel (2), Jean-Luc Berenguer (3), Anita Bokwa (4), Angelo Camerlenghi (5), Francesca Cifelli (6), Francesca Funciello (6), Carlo Laj (7), Stephen Macko (8), Annegret Schwarz (9), Phil Smith (10), Herbert Summesberger (10), and the Eve Arnold Team

(1) Geological Sciences, Stockholm Univ., Stockholm, Sweden, (2) Fachkoordinator für Geographie, Landeshauptstadt München, Germany, (3) Centre International de Valbonne, Sophia Antipolis, France, (4) Jagiellonian Univ., Institute Geography and Spatial Management, Cracow, Poland, (5) ICREA, Geologia, Univ. de Barcelona, Spain, (6) Dipart. Scienze Geologiche, Univ. Studi Roma, Roma, (7) Laboratoire des Sciences du Climat, Gif-sur-Yvette cedex, France, (8) Dept. Environmental Sciences, Univ. Virginia, Charlottesville, VA USA, (9) Gymnasium an der Stadtmauer, Hospitalgasse 6, 55543 Bad Kreuznach, Germany, (10) Natural History Museum, 1010 Wien, Burgring 7, Austria

GIFT workshops are a two-and-a-half-day teacher enhancement workshops organized by the EGU Committee on Education and held in conjunction with the EGU annual General Assembly. The program of each workshop focuses on a different general theme each year. Past themes have included, for example, “The Polar Regions”, “The Carbon Cycle” and “The Earth From Space”. These workshops combine scientific presentations on current research in the Earth and Space Sciences, given by prominent scientists attending EGU General Assemblies, with hands-on, inquiry-based activities that can be used by the teachers in their classrooms to explain related scientific principles or topics. Participating teachers are also invited to present their own classroom activities to their colleagues, even when not directly related to the current program. The main objective of these workshops is to spread first-hand scientific information to teachers in primary and secondary schools, significantly shortening the time between discovery and textbook. The GIFT workshop provides the teachers with materials that can be directly incorporated into their classroom, as well as those of their colleagues at home institutions. In addition, the full immersion of science teachers in a truly scientific context (EGU General Assemblies) and the direct contact with leading geoscientists stimulates curiosity towards research that the teachers can transmit to their pupils. In addition to their scientific content, the GIFT workshops are of high societal value. The value of bringing teachers from many nations together includes the potential for networking and collaborations, the sharing of experiences and an awareness of science education as it is presented in other countries. Since 2003, the EGU GIFT workshops have brought together more than 500 teachers from more than 20 nations. At all previous EGU GIFT workshops teachers mingled with others from outside their own country, informally interacted with the scientists, providing a venue for rich dialogue for all participants. The dialogues often included ideas about learning, presentation of science content and curriculum. Programs and presentations of past GIFT workshops, with some available with Web streaming, are available at
