

## **Geodiversity & Geoheritage Education through Geotourism Textbooks in Iran**

B.N. Sadry

Geology Department, Payame Noor University, 19395-4697 Tehran, I.R. of IRAN

Nowadays, emerging geotourism education gradually in some countries in the world, and on the other hand, geodiversity and geoheritage issues and geoconservation measures as a base for geotourism promotion ,makes it as a useful tool for geodiversity and geoconservation education in Iran. But, because of interdisciplinary nature of geotourism, instructional approaches is divided into the two formal educational programmes including geology program and tourism program.

This article explores a geology program at Payame Noor University (PNU) as a long-distance mega university in Iran. And at the end, this method is presented for the first time as a instructional sample of geodiversity and geoheritage education in the world.
