

## New Elemental Maps of the Nearside Lunar Highlands

M. Grande, J. A. Carter, and the The C1XS Team

Aberystwyth University, Institute of Mathematical and Physical Sciences, Aberystwyth, Ceredigion, United Kingdom  
(mng@aber.ac.uk, (44) 1970 622826)

A set of elemental maps obtained by the Chandrayaan-1 X-ray Spectrometer (C1XS) and covering the Southern Nearside Lunar Highland region will be presented. The elements mapped will include magnesium, silicon and aluminium, as well as relevant elemental ratios. These will be compared to other datasets including Lunar Prospector, Clementine and M3 mineral maps.
