

Education of geodesy and cartography at the School of Higher Education In National Economy In Kutno, Poland.

Janusz Sledzinski

School of Higher Education in National Economy, Institute of Technical Sciences, Department of Geodesy, Kutno, Poland
(jsledzinski@gik.pw.edu.pl)

School of Higher (university degree) Education in National Economy in Kutno is one of the rather younger university schools in Poland that were established in the last years of the XX century. It was founded in 1998, but the convenient location of Kutno in Central Poland seems to be a good opportunity for students coming from all parts of Poland. The School is continuously developed, number of faculties and new study directions and specialisations are steadily growing. The offer of the School include studies in the stationary, extra-mural and post-graduate systems in two Engineering (or licenciate) and M.Sc. levels. At the moment the geodesy and cartography is a part of the Faculty of Technical Sciences; students can chose one of three specialisations: 1.Economic geodesy, property and estate management, 2. Rural (agriculture) geodesy and property engineering and 3. Geoinformatic sciences.
