

## **Magnetospheric Current Systems: Recent Progresses and Outstanding Issues**

Shinichi Ohtani

JHU/APL, Space Dept., Laurel, United States (ohtani@jhuapl.edu)

In this presentation I shall review, mostly from the observational point of view, some recent progresses of our understandings of magnetospheric current systems and shall discuss outstanding issues. An emphasis will be placed on large-scale internal current systems such as the cross-tail current, ring current, and Birkeland currents.
