## **EQInfo - earthquakes world-wide**

Bernd Weber and Stephan Herrnkind  
gempa GmbH, Potsdam, Germany (info@gempa.de)

EQInfo is a free Android app providing recent earthquake information from various earthquake monitoring centers as GFZ, EMSC, USGS and others. It allows filtering of agency, region and magnitude as well as controlling update interval, institute priority and alarm types. Used by more than 25k active users and being in the top ten list of Google Play, EQInfo is one of the most popular apps for earthquake information.
