

New perspectives for European climate services: HORIZON2020

Claus Bruning and Andrea Tilche

European Commission DG Research & Innovation, Unit I.4 – Climate change and Natural Hazards

The developing of new end-to-end climate services was one of the core priorities of 7th Framework for Research and Technological Development of the European Commission and will become one of the key strategic priorities of Societal Challenge 5 of HORIZON2020 (the new EU Framework Programme for Research and Innovation 2014-2020).

Results should increase the competitiveness of European businesses, and the ability of regional and national authorities to make effective decisions in climate-sensitive sectors. In parallel, the production of new tailored climate information should strengthen the resilience of the European society to climate change.

In this perspective the strategy to support and foster the underpinning science for climate services in HORIZON2020 will be presented.
