

7 years of MacGyver sessions at EGU and AGU: what happened?

Rolf Hut (1), John Selker (2), Steven Weijs (3), Wim Luxemburg (1), Andy Wickert (4), Theresa Blume (5), Jan Bamberger (6), Cathelijne Stoof (7), and Flavia Tauro (8)

(1) Delft University of Technology, Faculty of Civil Engineering and Geoscience, Delft, Netherlands (r.w.hut@tudelft.nl), (2) Oregon State University, (3) EPFL, (4) University of Colorado, Boulder, (5) GFZ-potsdam, (6) UFZ, (7) Wageningen University, (8) University of Tuscia

The session that this poster is in, the: “Self-made sensors and unintended use of measurement equipment”, also known as the “MacGyver-session” has had 7 years of scientists contributing their self made devices, hacks and solutions with the hydrological community. In 2009, the first session was held at the AGU fall meeting and since 2011 a session is also organised at the EGU General Assembly. On this poster, and in the accompanying review paper, we will present an overview of the work presented in the last 7 years, cataloging the work of the inventive scientists who have contributed to these successful, and above all: fun, sessions.
