

Jón Egill Kristjánsson and Arctic and Mountain Meteorology

Haraldur Olafsson (1) and Guðrún Nína Petersen (2)

(1) (haraldol@hi.is) Háskóli Íslands & Veðurstofa Íslands, Iceland, (2) (gnp@vedur.is) Veðurstofa Íslands, Iceland

Jón Egill Kristjánsson contributed significantly to science in mountain and Arctic meteorology. In this talk, highlights will be given of his research on flows in the North-Atlantic/Arctic including the field experiments GFDEX, GREENEX and the IPY-THORPEX as well as from several other research projects in the same field. Some attention will be given to his writing for the general public and his enthusiasm for the environment.
