Politecnico di Torino, Turin, Italy

**Department of Earth Sciences, Sapienza University of Rome, Italy.

Area of Interest – Latin Valley (Central Apennines)

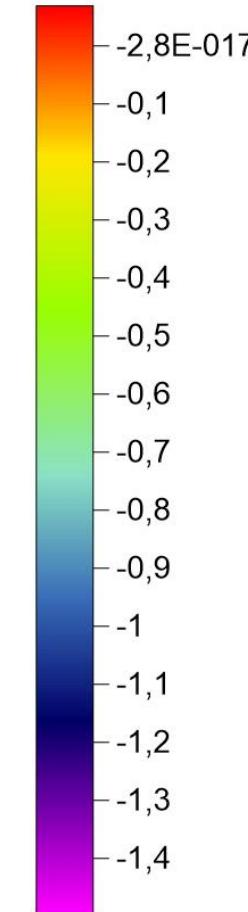

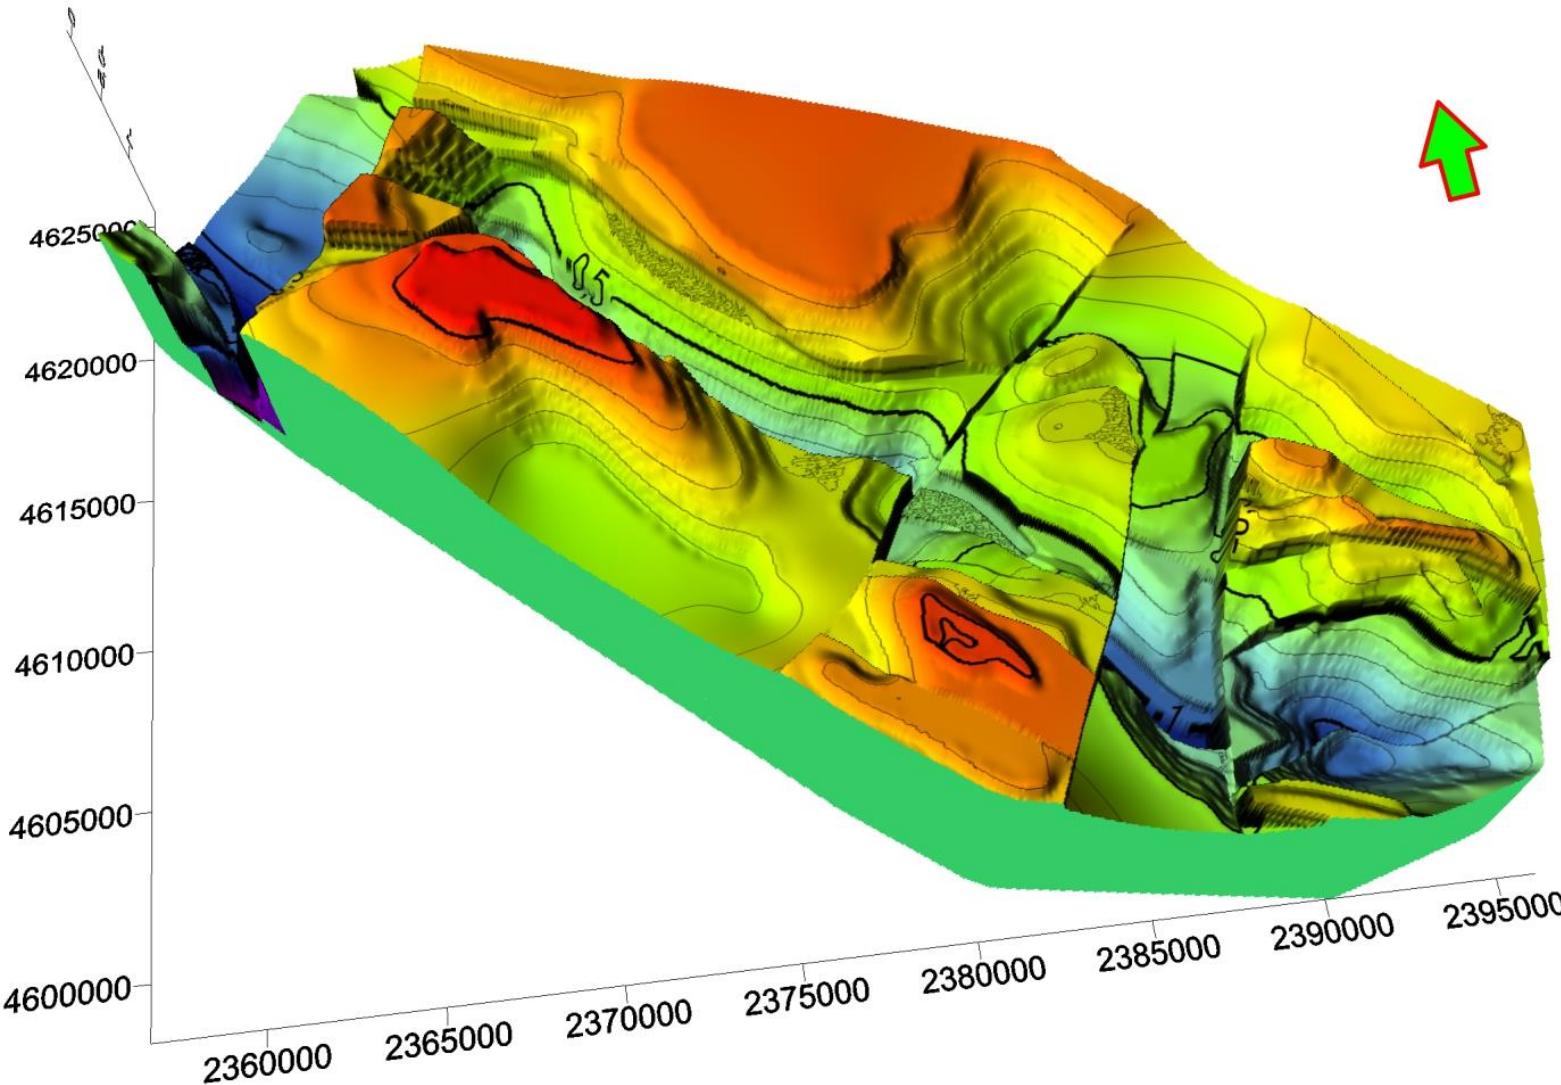

Geological sketch map of Italy (on the left); sketched geological map of the northern Volsci Range and Latin Valley with the location of the studied wells, seismic lines (on the right); Simplified stratigraphic columns of the Latin Valley, correlated to the official cartography (Centamore et al., 2010). Messinian stratigraphic relationships are inspired to the work of Pasquali et al. (2007).

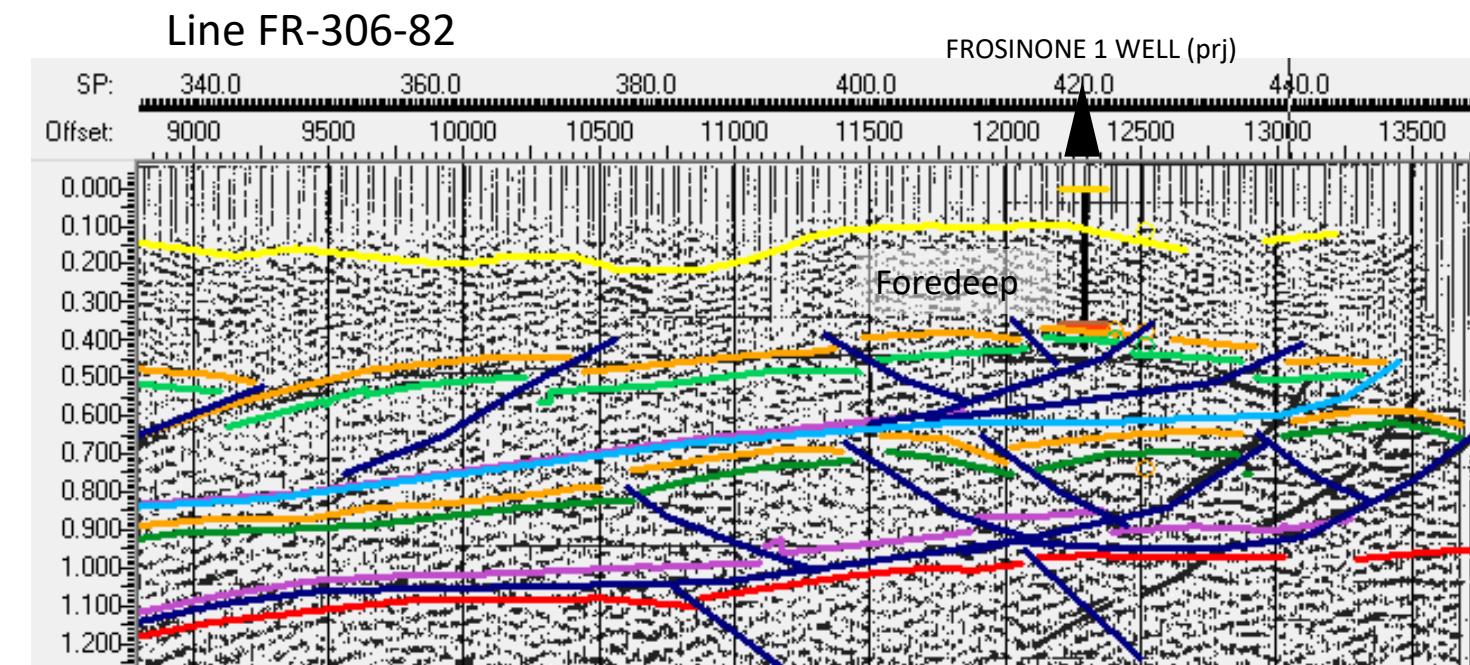

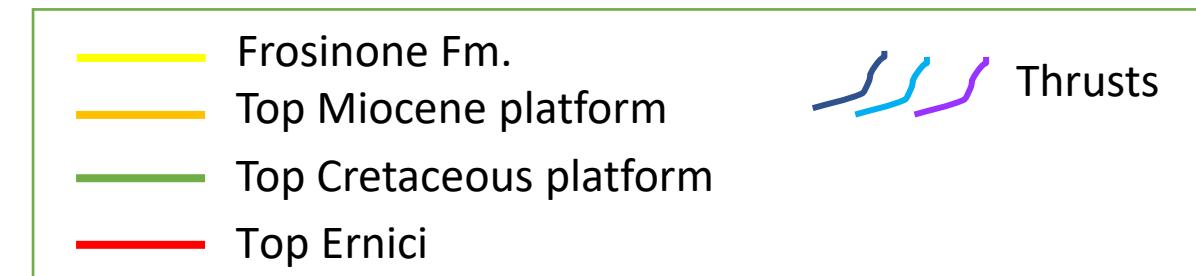

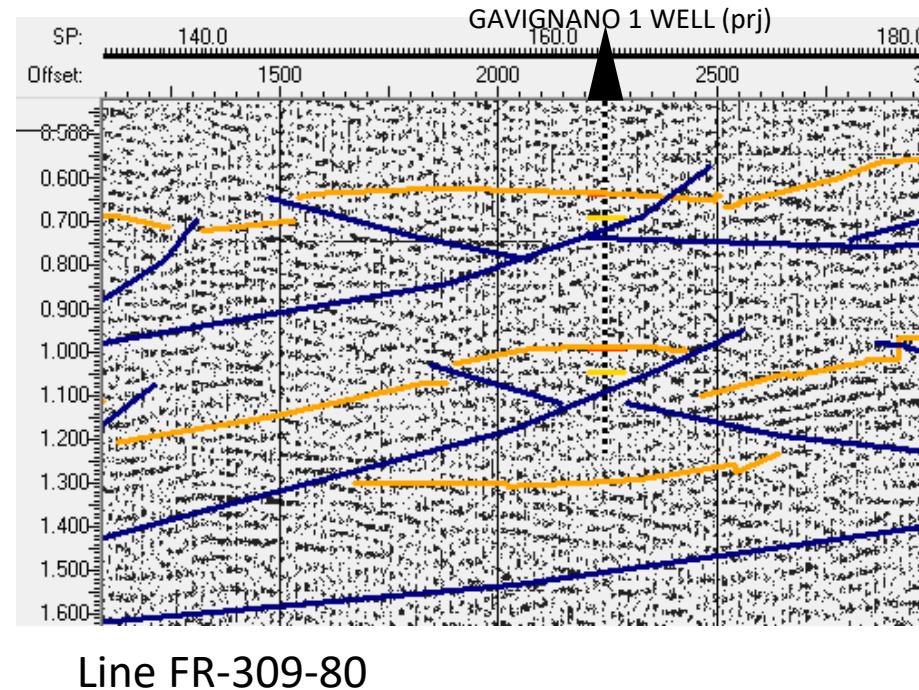

Structural overview of the Volsci Range front respectively from top to bottom representing the northern, central and southern sectors of the study area

3D view of TWT map of the Top Miocene platform

- Grid was built and modified from literature data available in VIDEPI database website, after collecting several information.
- This is step 0 before starting with the interpretation of seismic data.

Sketches from seismic interpretation
