

EOS6.2 Enabling Women in Geoscience: Inspiration, Challenges and best Practice

Conveners: Madeleine Hann^{ECS}, University of Manchester;
Sarah Boulton, University of Plymouth;
Jodie Fisher, University of Plymouth;
Daisy Hassenberger^{ECS}

RATIONALE

- Women are under represented across the Geosciences. From academia, to industry, and from undergraduate through to PhD student.
- Now more than ever we are looking at gender equity across all areas of Geoscience.
- There are already some fantastic and award winning initiatives encouraging and enabling women into the geosciences, and supporting those already here.
- However, gender equity will only be achieved through conscious action and the support of the whole geoscience community.
- To do this we want to raise awareness of the amazing work already being done, showcasing best practice, as well as the challenges these initiatives have faced.

SESSION AIMS

- We aim to showcase some of the fantastic initiatives that are already making a difference to gender equity across the geosciences.
- We aim to highlight good practice, and the impact these have had in raising the profile of our women geologists across the sector.
- We aim to share experience and creativity, and the successes and challenges, from these initiatives aspiring to increase gender diversity in all areas of geoscience.
- We aim to inspire others to support women within the geosciences, through initiatives, through getting involved, and through opening up the conversation as to what more can we do?

We look forward to your contribution to our discussion

CHAT ROOM INFO

Welcome to our chat session: Wednesday 6th May 2020 8:30-10:15

8:30 Session welcome from session chairs Sarah Boulton and Jodie Fisher and discussion of uploaded presentations

- Each contribution will get 10 minutes of discussion
- The conveners will introduce each contribution
- The presenting authors will give a short summary/introductions of their work (2-3 sentences) – these can be prepared in advance, before opening the chat to questions.

10:00 If time permits we will have a more general discussion to look at good practice in inspiring women in the geosciences and what more we can do.
