

## Summary for the session NH5.1 Tsunamis (Co-organized by OS2/SM2)

The tsunami session welcomes multidisciplinary contributions covering any aspect in tsunami science, encompassing field data, regional hazard studies, observation databases, numerical modeling, risk studies, real time networks, operational tools and procedures towards a most efficient warning.

We have so far 29 displays ready, thank you for your participation. Therefore we will have to limit the chat **to 5 to 6 minutes per display**.

**@authors: be ready to have 2 to 3 sentences to introduce your topic and then answer to questions!**

We are looking forward to having many fruitful discussions and remarks!

Your conveners,

H. Hébert, I. Didenkulova, A. Armigliato, M. Canals
