---

Dear participants of EGU session TS10.3 on modelling of tectonic processes,

We will start the discussion at 10:45 CET on Monday 4 May, and it will last until 12:30 CET, although the chat will remain active for 30 min more.

This is how we plan to carry on the session:

- Every contribution will get about 5-10 minutes of discussion
- The conveners will introduce the contribution (title, authors,...)
- The presenting authors will give a short summary/introduction (2-3 sentences) of their work (@ authors, please prepare these in advance).
- Discussion with participants

If time permits, we will have a more general discussion after all contributions have been presented.

Here's the order of the presentations:

- Withers & Cruden
- Hughes et al.
- Noguera & Marques
- Schöfish et al.
- Mannu et al.
- Maestrelli et al.
- Paez et al.
- Wang et al.
- Saha et al.
- Zhong & Li
- Henriet et al.
- Jiménez-Bonilla et al.

We are looking forward to meeting you in the session chat box!
