Dear authors/attendees,

welcome to session **SSS5.5 “*Biomass and waste valorization within a circular economy: from urban mining to soil amendments*”**. We are looking forward to discuss current research and recent advances on the use of organic amendments in modern agriculture as well as for the restoration of degraded soils.

We will discuss the displays in order of appearance (according to the box you will find to the top-right). We will ask each author to provide few sentences of introduction about the research presented, and then we will take questions.

We look forward to meeting you in the chat.

**Chat Tue, 05 May, 10:45–12:30 (round 1);**

**Chat Tue, 05 May, 14:00–15:45 (round 2)**
