

Session special issue

We are organizing an EGU Inter-journal special issue (ESD/BG/ACP/GMD/NHESS) for our session which will be co-edited by Fang Li, Sandy Harrison, Nadine Under, Renata Libonati, Sander Veraverbeke. We also encourage submissions of manuscripts outside this session but related to the session's topic.

If you plan to submit MS to the special issue from Jun 2020 to Dec 2021, please send me (lifang@mail.iap.ac.cn) your possible title and authors of MS **before May 15**. A tentative list of manuscripts is a part of special issue proposal. The title and authors can be adjusted later when you are ready for submitting to the journal you like, but we likely cannot add new MSs after the proposal of special issue is approved. We would appreciate very much if you could forward this message to your colleagues and friends.
