

CL1.13

**Carbon cycle changes from the Last Glacial Maximum to the Pre-industrial: new insights?**

Information for the chat session :

- Presenting authors: please prepare a 1-2 sentence summary in advance which you can paste in when your display is called up for discussion after the introduction of your title by the convener
- Everyone: Questions and Answer: start with @name

We'll go from one display to another, each author will first present its display with 1-2 sentence summary and we'll then have questions for around 10 minutes before we move on to the next display. Please stop asking questions on the previous display when we move to the next one to avoid confusion.
