

**Welcome to the chat session**  
**CL4.13**  
**Arctic climate change: governing mechanisms and global implications**

**Moderator:** Rune Graversen

**Please be aware:** Chat discussion is very welcome but can fast be a little chaotic. We will mostly discuss one work at a time. The moderator will introduce each presenter. **As a presenter please prepare up to 5 sentences introducing your work and providing the main conclusions. Those you can provide just after you have been introduced.** There are about 5 minutes per presentation and the moderator will keep track of the time.

**Order of presentation:**

- |                                     |                          |
|-------------------------------------|--------------------------|
| 1. Judah Cohen                      | 12. Yuefeng Li           |
| 2. Timo Vihma                       | 13. Alexander Kislov     |
| 3. Daniel Topal                     | 14. Kunhui Ye            |
| 4. Steve Delhay                     | 15. Amber Walsh          |
| 5. Tetsu Nakamura                   | 16. Kaushik Gupta        |
| 6. David Docquier                   | 17. Kwang-hee Han        |
| 7. Katharina Harmuth                | 18. Luca Ferrero         |
| 8. Yoshihiro Tachibana              | 19. Varunesh Chandra     |
| 9. Philippe Goulet Coulombe         | 20. Johanne H. Rydsaa    |
| 10. Srinath Krishnan                | 21. Rune Grand Graversen |
| 11. Tuomas Ilkka Henrikki Heiskanen |                          |

*The order may change*
