15:15-15:45 General Discussion

We decided to make the most of our session by giving all speakers the opportunity to present their displays as **live-talks**. To get the full experience do the following:

Step 1: Log into the EGU online chat

Step 2: Download/open the uploaded presentations

Step 3: In addition, log into the secured BigBlueButton-Room provided at

<https://mediaportal01.rz.uni-kiel.de/b/dr--ggw-9kj>

Step 4: Post your questions/comments for the presenters in the EGU online chat

Each presenter has **12 minutes** after which we will have **three minutes** for quick online questions.

In the last 30 min of the Session we will have time to address general questions on the talks and discuss their relation to exoplanetary science in general.
