

AS1.36: PRECIPITATION: MEASUREMENT, CLIMATOLOGY, REMOTE SENSING, AND MODELLING

CONVENERS: SILAS MICHAELIDES, VINCENZO LEVIZZANI, GAIL
SKOFRONICK JACKSON, AND YUKARI TAKAYABU

Session guidelines

- The text chat session will follow the AS1.36 session list, distributing available time over all **uploaded** presentations.
- Authors, please prepare a 1-2 sentence summary in advance, which you can paste in when your display is called up for discussion by the conveners.
 - If you are unable to be present at the live-chat time frame due to any reason, please post your 1-2 sentence as a comment under your uploaded presentation and the conveners will move it into the chat area for the group to comment on it.
- Participants, please prepare your brief questions on uploaded presentations for pasting into the text chat session.
- Unfortunately there will not be enough time during the live chat to "discuss" presentations that have not been uploaded. Feel free to comment to the authors that you are interested in their material.
- Looking forward to an animated session!
