Environmental Agency of Slovenia, Ljubljana, Slovenia (tanja.cegnar@gov.si, +386 1 4784074)

For a number of years part of the European Meteorological Society Annual Meeting is also the Media session. Its purpose is to bring together meteorologists and climatologists involved with the media, but also journalists covering the topics weather, climate and climate change. The session is a platform to share experience and examples of good practice in explaining and promoting meteorology and climatology; during the last years communication of climate change issues is becoming a dominant issue of the session.
