

Methodical Group and its role for maintaining competencies of meteorological personnel in the Institute of Meteorology and Water Management National Research Institute in the light of WMO requirements

M. Ozga and M. Barczyk

Institute of Meteorology and Water Management National Research Institute (IMWM), Warsaw, Poland
(Magdalena.Ozgaimgw.pl, Mateusz.Barczykimgw.pl)

In this presentation we will present Methodical Group achievements which are a part of competency system applied in IMGW and we will show future plans and proposed solutions for the fulfillment of competency and qualification standards for Meteorological Personnel in the light of WMO requirements.

We will focus on the on-line trainings which are conducted with Saba Centra web-conferencing tool and we will try to highlight their importance in the maintaining competencies of meteorological personnel, especially in the field of Meteorological Services for Civil Aviation.

We will explain the structure of trainings, methods and strategies applied, in order to both, increase motivation of participants and properly respond to the standards mandated by auditors. Lastly, we would like to emphasize the great role which on-line trainings play in sharing knowledge and teaching experiences among forecasters and teachers in the National Meteorological and Hydrometeorological Services around the world.
