EUMeTrain activities in 2013 and beyond

A. Wirth

Zentralanstalt für Meteorologie und Geodynamik, Remote Sensing, Vienna, Austria (Andreas.Wirth@zamg.ac.at)

EUMeTrain is an international project, founded and financially sponsored by EUMETSAT, and dedicated to the development of satellite meteorology training resources and training methods. EUMeTrain addresses to operational forecasters and meteorologists working in the field of satellite meteorology. Its aim is to divulge knowledge on satellite data, making them understandable and applicable in every day situations. Training activities concentrate on the needs of forecasters in their daily shifts.
The poster will show the focal points of EUMeTrain, its current and future activities.
