

MeteoSwiss - Natural Hazards at a glance Mobile App

Barbara Galliker

Federal Office of Meteorology and Climatology MeteoSwiss

Smartphones have become crucial items for severe-weather safety. The Swiss National Weather Service, MeteoSwiss, has developed new features for their app. Now the app not only includes weather forecasts, animations, and current measurements, but for the first time the app can now push severe weather alerts directly to your smartphones's home screen if an alert is issued in any of the areas you have selected.
