

Cosmic Art Projects – How can we approach ‘the universe’?

Dr. Yuri Tanaka

Tokyo University of the Arts, Japan (yuri_tanaka@10.alumni.u-tokyo.ac.jp)

Abstract

Scientists, engineers, artists and designers approach ‘the universe’ - which is ever unknown - in different ways. By means of collaboration through mediation among different individuals, the author will present her previous and current projects in public spaces and art/science festivals. This would open a new approach to ‘the universe’ in a poetic manner.
