Europlanet 2024 RI - Global Collaboration and Integration Development, NA1-T4: Strategic Plan 2020–2024

Barbara Cavalazzi, Anita Heward, Valentina Marcheselli, and Nigel Mason

Dipartimento di Scienze Biologiche, Geologiche e Ambientali, Università di Bologna, Italy, barbara.cavalazzi@unibo.it

Since its foundation in 2005, Europlanet has sought to reach out and engage with planetary scientists across the globe. Today, Europlanet has a global role to connect the international planetary community through the common aim of working together to explore and understand our Solar System and exoplanetary systems beyond. It is therefore both timely and necessary to put in place a framework for a community-led roadmap for global collaboration as part of Europlanet's future development as both a Research Infrastructure and as a Society.

The Strategic Plan for Europlanet 2024 Research Infrastructure's Global Collaboration and Integration Development that represents the outcome of a dedicated effort to define how to expand and intensify the new relationship between Europlanet and African, but also between Europlanet and North and South American and Asian collaborators, will be presented.
