

## **Force11 Software Citation Implementation Working Group and Force11 Hackathon**

Neil Chue Hong, Lars Holm Nielsen, and Martin Fenner

Force11 Software Citation Implementation Working Group and Force11 Hackathon

The Force11 Software Implementation WG was launched in May 2017 to follow up on the work in the Force11 Software Citation WG. In this session we want to a) give an update on the status of the WG and the work planned, b) introduce Software Heritage, a long-term archive for all open source source code, c) discuss the codemeta metadata standard and how to move forward beyond the initial project funding, and d) discuss how the DataCite 4.1 Metadata Schema that will be released in the coming weeks specifically addresses software.

Following this introduction we will spend the rest of the day with the Force11 Hackathon, focussing on software citation, data citation, and open citations. Participation is open to everyone and we will start by discussing interesting topics and forming teams. We will summarize and discuss the work done during the day in the last hour.
