Reach out to open source software community projects

Peter Löwe
DIW Berlin, Orcid 0000-0003-2257-0517

Since 2016 are growing number of Open Source Software projects have been organising themselves in the OSGeo umbrella organisation. OSGeo projects are quality checked, as they have are evaluated in an incubation process whether their level of self-organisation meets the OSGeo standards of quality software. This talk will introduce OSGeo, its mission, achievements and scientific working groups to argue the case of establishing an exchange with FORCE11 to benefit from each others experiences in the greater field of Open Science.
