

Research innovations and open science practices in Eastern Europe

Aliaksandr Birukou (1), Eleonora Dagiene (2), and Martin Fenner (3)

(1) Springer Nature, Orcid 0000-0002-4925-9131, (2) Vilnius Gediminas Technical University, Orcid 0000-0003-0043-3837,
(3) DataCite, Orcid 0000-0003-1419-2405

The purpose of this session is to explore how research innovations and open science practices are adopted in Eastern Europe and the Commonwealth of Independent States. We will have a mix of academics and publishers having experience in the region to discuss what challenges are specific for their community when it comes to introducing new scientific technologies (ORCID, CrossMark, PIDs) and practices (data publishing, novel models of peer review, etc).
