

## **Cyber(e)-infrastructures for Hydrometeorology**

S. Nativi

Italian National Research Council, Institute on Air Pollution (IIA), Rome, Italy (stefano.nativi@cnr.it, +39 0574 602524)

This presentation will introduce and discuss cyber(e)-infrastructure design and development to facilitate and support the research and operation in the Hydrometeorology area. Main challenges, available technologies, and ongoing initiatives will be discussed.

Interoperability issues will be addressed with particular attention to cross-disciplinarity aspects. Relevant European and international initiatives, like INSPIRE and GEOSS, will be introduced.
